Mobeus's first year of independence has been an outstanding one. The firm's rebrand did not detract from the VCT manager's investment pace, announcing four new deals (Tessella, Motorclean, ATG Media and Gro Group) and three divestments. Two of these exits, Brookerpaks and British International, saw patient management teams complete long hauls to reap the rewards of their labours amid challenging conditions. One of the exits returned 4x money to the VCT.

The firm achieved a record fundraising during the judging period, raising an oversubscribed £25m vehicle to back British businesses.

“Judges said: Their own buyout was very impressive – they got out and had a great first year on their own. They raised a record fund and achieved seven transactions during the same time period. They've truly been reinvigorated by the buyout; you notice a spring in the team's step now”

Mobeus focuses on lower mid-market MBOs, investing up to £10m into companies making between £1m and £3m operating profits.
